

# CONCRETE PLANTS INC.

New and Used Batch Plant Equipment • Consulting  
Engineering • Installation • Parts

## Ready Mix Plants - Precast Plants

When planning a new plant, all alternatives are taken into consideration, resulting in a high-efficiency production facility with that is easy to maintain and repair. Concrete Plants has installed numerous dry and central mix batch plants throughout the East Coast.

In addition to plant equipment, we can also provide complete turnkey projects with site layout, engineering of civil works, permit drawings, mechanical and electrical installations, as well as start-up.

## Retrofit Plants

When a complete new plant may not be required, we're often able to utilize existing plant components and upgrade your production capacity by retrofitting modern equipment into the existing facility.
